(54) Title: **DEVICE, KIT AND METHOD FOR PULSING BIOLOGICAL SAMPLES WITH AN AGENT AND STABILISING THE SAMPLE SO PULSED**

(57) Abstract: The present invention is related to a device, kit and method for pulsing a biological sample with a pulsing agent and subsequently stabilizing the biological sample so pulsed. The invention has application in the fields of medical diagnostics, particularly relating to immunity. One embodiment of the present invention is a vessel suitable for accepting a liquid biological sample, exposing said sample to a first substance and subsequently a nucleic acid stabilising agent, said vessel comprising: a) a first substance present inside said vessel, b) a container in which said stabilising agent is present, c) a connection between the inside of said vessel and the inside of said container, d) a physical barrier that temporarily blocks said connection.
